FROM THE DESK OF PRESIDENT, PHFI

Professor Sanjay Zodpey

MD, PhD, DSc (honoris causa)

Doctor of Medicine (honoris causa)

President - Public Health Foundation of India (PHFI)

Dear Colleagues,

Greetings from Public Health Foundation of India!

I am delighted to present to you the Placement Brochure for the year 2024-26. I want to take this opportunity to thank you for the invaluable support you have extended to us over the years.

In a very short time, Indian Institutes of Public Health (IIPHS) have made a niche by providing competency-driven academic programs in public health. IIPHS create an inclusive and global learning environment, which prepares our students and alumni for future leadership challenges. Our alumni work in diverse public health areas in India and abroad and contribute to this cause in varied ways.

Our academic curriculum is benchmarked with the industry requirements and focuses on field visits, case studies, class assignments, presentations, group work, journal clubs, research, and hands-on experience through dissertations and internships, which helps students identify and respond to current public health challenges. Alumni talks and professional skill development sessions during the course.

Our students of outgoing batches of MPH, MSc, MHA, MPH-PHN, BSc PH and PGDPHM programs across IIPHS for the academic year 2024-26 comprise enthusiastic, vibrant, energetic and professionally competent students with heterogeneous backgrounds, persona and motivation for working in public health and related disciplines. I am sure that their commitment will make them a great asset to your organization. Over the years, the employers have given very positive feedback about our students, about their knowledge and skills, commitment towards work and innovative ideas.

I wish them a very successful career ahead and extend a warm welcome to prospective employers to include IIPHS in their list of prominent institutions to be visited for campus placements. I am confident that our collaboration will go a long way and be helpful for these budding public health professionals to build their careers. On behalf of the IIPHS, I extend a warm welcome to your organization to participate in the placement process.

FROM THE DESK OF DIRECTOR-ACADEMICS, PHFI

Prof. Himanshu Negandhi

Director- Academics

Public Health Foundation of India (PHFI)

Dear Colleagues,

Greetings from Public Health Foundation of India!

We at PHFI and Indian Institutes of Public Health (IIPHS) are committed towards delivering public health academic programs through a blend of multidisciplinary approaches. The IIPHS have created a niche for themselves through teaching, research and excellence in the field of public health. Our academic courses aim at a comprehensive development of our students through a blend of academic activities and relevant public health exposure. Every year, our graduates add to the pool of trained public health professionals, ready to make a mark in diverse profiles and contribute to the overall health and national development. The encouraging learning environment, coupled with an engaging pedagogy, has helped our students acquire technical skills relevant to public health.

IIPHS are driven by the belief that the holistic development of students needs an environment that encourages student growth through regular mentorship. Our academic training for students ensures that they are fully trained to pursue their professional careers. I wish our students all the very best in their future endeavours.

I express our sincere gratitude to all the organizations that have extended their active support and helped us become a preferred choice to recruit public health graduates. Through this placement brochure, I extend a warm welcome to various organizations working in public health, clinical research, and hospital administration to recruit fresh talent through our talented pool of graduates, who will be an asset to your organization.

About The Public Health Foundation of India

“Institutions (like PHFI) have a catalytic role to play (in the public health sphere in India) and can bring a transformational change.”

Hon' Prime Minister, Narendra Modi –at the IIPH-Gandhinagar Bhoomi Poojan ceremony during his tenure as Chief Minister of Gujarat, 2007

The Public Health Foundation of India (PHFI) is a public-private partnership launched in 2006 with support from the Ministry of Health and Family Welfare (MoHFW).

It was launched to redress the limited institutional capacity in India for strengthening training, research and policy development in the area of Public Health. The creation of PHFI was enabled by the Ministry of Health and Family Welfare, Government of India and was supported by several state governments and foundations, including the Bill and Melinda Gates Foundation, the Wellcome Trust and the philanthropic private sector. PHFI adopts a broad, integrative, multi-disciplinary and multi-sectoral approach to public health and engages with the many dimensions of public health that encompass primitive, preventive and therapeutic services. PHFI aims to play an enabling role in the transformation of India's health scenario by working collaboratively with all the stakeholders in the health system. It provides technical support and assistance to state governments for informing and aiding governmental initiatives. It also engages with the research community, academia, NGOs, civil society and international agencies towards a collective action on health.

Objective: As there is no ranking designed for schools of Public Health, the aim of this project was to create one.

Methods: To design the Public Health Academic Ranking (PHAR), we used the iNCites Benchmarking and Analytics™ software and the Web Of Science™ Core Collection database. We collected bibliometric data on 26 schools of Public Health from each continent, between August and September 2022. We included 11 research indicators/scores, covering four criteria (productivity, quality, accessibility for readers, international collaboration), for the period 2017–2021. For the Swiss School of Public Health (SSPH+), a network gathering faculties across different universities, a specific methodology was used, with member-specific research queries.

Results: The five top schools of the PHAR were: London School of Hygiene and Tropical Medicine, Public Health Foundation of India, Harvard T.H. Chan School of Public Health, SSPH+, Johns Hopkins Bloomberg School of Public Health.

Conclusions: The PHAR allows worldwide bibliometric ordering of schools of Public Health. As this is a pilot project, the results must be taken with caution. The article aims to critically discuss its methodology and future improvements.

Keywords: ranking methodology, university rankings, public health, schools of public health, public health academia, normalized bibliometric indicators

PHFI is ranked 2nd among the Schools of Public Health GLOBALLY

Public Health Academic Ranking (PHAR), published (March 2024) in the International Journal of Public Health

VISION

“Our vision is to strengthen India’s public health institutional and systems capability and provide knowledge to achieve better health outcomes for all “

MISSION

- Developing the public health workforce and setting standards
- Advancing public health research and technology
- Strengthening knowledge application and evidence-informed public health practice and policy

VALUES

Public Health Education at PHFI

Emerging as an institute of excellence in public health, our faculty brings multi-disciplinary experience and has hands on expertise in local, national, and international health settings

Over the past decade, PHFI has established Indian Institutes of Public Health (IIPHS) located at Gandhinagar (Gujarat), Hyderabad (Telangana), Delhi, Bhubaneswar (Odisha), Shillong (Meghalaya) and Bengaluru (Karnataka). These institutes help address the current shortage of trained public health professionals and workers by providing world-class, India-relevant programs in affiliation with renowned universities.

Ministry of Education, on the advice of the UGC, have declared 'PHFI Institute of Public Health Sciences, Kismatpur, Hyderabad, Telangana' along with two constituent units at Bengaluru and Bhubaneswar as an Institution Deemed to be University under distinct category. The Indian Institute of Public Health – Gandhinagar (IIPHG) has been granted University status by a legislative act of Gujarat state in May 2015.

The mission of PHFI and IIPHS is to respond to India's public health challenges and initiate and catalyse action for better health outcomes. The IIPHS strive to contribute towards the creation of an effective public health workforce in the country. PHFI and its constituent Indian Institutes of Public Health are engaged in program and policy-relevant research, as well as imparting world-class education that is contextualized for the Indian setting. PHFI has also established several Centres of Excellence, which work on cutting-edge evidence generation for informing public policy. These centres of excellence and our multidisciplinary team of researchers, with medical and non-medical backgrounds who specialize in technical areas such as health economics, health systems and financing, policy analysis, infectious diseases, chronic diseases, program management, epidemiology, clinical research, genetics, nutrition, biostatistics and demography, bring a unique richness to the working environment at the Foundation.

The Indian Institutes of Public Health are delivering full-time two-year Master of Public Health (MPH); Master of Hospital Administration (MHA); Master of Public Health–Public Health Nutrition (MPH-PHN); Master of Science in Health Economics and Technology Assessment (MSc HETA); Integrated MSc (Clinical Research) & PhD; one-year Post Graduate Diploma in Public Health Management (PGDPHM) and three-year Bachelor of Science in Public Health (BSc PH). An internship/training of 2-6 months is an important component of each academic program. These programmes are aimed at fresh graduates as well as experienced professionals from medical & allied health sciences, life sciences, AYUSH, dental science, and social sciences. The programmes are also attended by mid-level government officials nominated by the various state governments.

These courses are targeted at a wide variety of graduates who are interested in public health training at large. The course eligibility criteria reflect the need for multi-disciplinary inputs that are vital to public health. IIPHS have over 62 highly qualified faculty and 103 adjunct faculty with diverse experience. Their expertise is being put to good use in research, teaching and the practice of public health.
